

MicroBox Standard IO Shield

4 OUTPUTS

1 PWM Output – same as the LED on the Main MicoBox Board

All 5 outputs can be taken from here to additional external hardware

Reset / S1

S2

S3

Analog input – for easy example a voltage divider
of an LDR – Light Dependant Resistor to Plus
and a 2k2 resistor to GND

IO Shield to add some switches and LEDs
The same hardware as used by MMT
